

# Fairtrade

**Fairtrade companies want to make farmers' lives better. They want safe conditions for farmers.**

Farmers work hard and get little money. But big international firms earn so much money.

Fairtrade companies want to change it, because it isn't fair

In the world there are about 1400 Fairtrade towns in 23 countries. People in this town do campaign. In the Czech republic there are some Fairtrade towns too. Even some Fairtrade schools are involved in the campaign.

Our nearest Fairtrade town is Volyně. There were project days at local High School. Students met students from the other Fairtrade school, tasted and sold Fairtrade products and watched the documentary films about the Fairtrade. In May 2012 they made „Fair breakfast“ for residents of Volyně. They baked muffins from the Fairtrade ingredients and sold Fairtrade coffee and tea.
